

## Select Simulator

<http://www.selectsimulator.com>

1. Select Simulator is essentially a standard online application form, very similar to many of those you will fill in as you apply for jobs.
2. The simulator contains all the various sections you would expect of a standard application but with advice added (wherever you see the  icon) so you understand what is required.
3. To get maximum benefit, treat Select Simulator like a real application - fill in all the sections and pay attention to any help provided. When you are finished, you can use it as a basis for subsequent applications.
4. You don't have to fill in the whole form at one time. If you are pushed for time, you can still get a feel for how online applications work by browsing the site and clicking on the  links.
5. You will need to register before you access Select Simulator. Once you have registered you can go through the form at your own speed.
6. To log back into the system at a later date, click log on and enter your e-mail address and password.
