

How to Apply

(a) For Taught Postgraduate Programmes

- Obtain an application form for taught postgraduate programmes from Graduate Admissions, Registrar's Office at WIT or download it from our web site at www.wit.ie/pg
- Complete it fully, attach any additional documentation that may be required e.g. transcripts of results, evidence of English competence and return to the Graduate Admissions Office.
- The deadline for applications can vary from course to course and you should check the web site for details. Normally applications are requested by **31st May**. Provisional offers may be made to those who have not yet completed their final examinations. Late applications will be considered if places are available.
- A selection process operates and when there are more applicants than places, offers will be made on the basis of qualifications and experience.

(b) For Research Masters and PhD Programmes

- Obtain an application form for Research postgraduate programmes from Research Postgraduate Admissions Section, Registrar's Office at WIT or download it from our web site at www.wit.ie/pg
- In some cases there are opportunities to work on funded research projects, these are advertised in the national and local press and on our website. Those interested apply for the competition and qualified applicants will be short listed and interviewed for selection.
- In all other cases, each individual completes and submits a research postgraduate application form which they obtain from the Research Postgraduate Admissions Section or from the website. The form will specify additional documentation that may be required e.g. transcripts of results, evidence of English competence.
- Applicants for research places are expected to have an idea for a research topic. They strongly advised to have had prior contact with WIT researchers to ensure that WIT has the capacity to supervise them and the facilities for the work they intend to undertake. Heads of Department and Research supervisors are happy to provide this type of advice to prospective postgraduates.

- Selection for research postgraduate places is on the basis of the applicant's qualifications and experience and on the ability of WIT to support their proposed research project.
- While research postgraduate applications can be submitted at any time of year, most of them are normally submitted in June when final examination results have been announced.

(c) International Applications

- Non-EU applicants should first submit a general international application form to the International Admissions Office available at <http://www.wit.ie/International/>
- This will enable the Institute to guide them about the feasibility of making a full postgraduate application.
- International applications should be submitted in March of the year of intended entry. Late applications will be considered if places are available.

Applications/Admissions

National/EU Applicants

Research Programmes:
 Research Postgraduate Admissions Section,
 Registrar's Office,
 Waterford Institute of Technology,
 Waterford, Ireland.
