Master of Arts in Management in Education

Programme Aims

On successful completion of the course, graduates will be able to:

- Demonstrate competence in strategic planning, mentoring, public relations, education law, financial management and information technology
- Demonstrate knowledge of educational leadership theory and related managerial functions
- Articulate and analyse their personal values in educational leadership and management
- Evaluate their practice in the light of theoretical perspectives through critical reflection on their own professional environment
- Display and further develop autonomous professional leadership and managerial initiative
- Research complex educational managerial issues, make sound creative judgments on these and communicate their findings.

Unique Aspects of the Programme

It is possible to study modules on an individual basis and be awarded single certificates on successful completion of same. Participants will be presented with theoretical concepts and will then engage in self directed learning through project work that will apply the learning to their own practice in their own particular settings. Participants have up to five years to complete the course.

Career Opportunities

Graduates can expect their careers to be advanced in the area of leadership in either primary, post-primary, higher and further education. This course is designed to enhance the professional capabilities of students as educational leaders and managers regardless of their current role or educational sector.
